

# Micro Probe Station

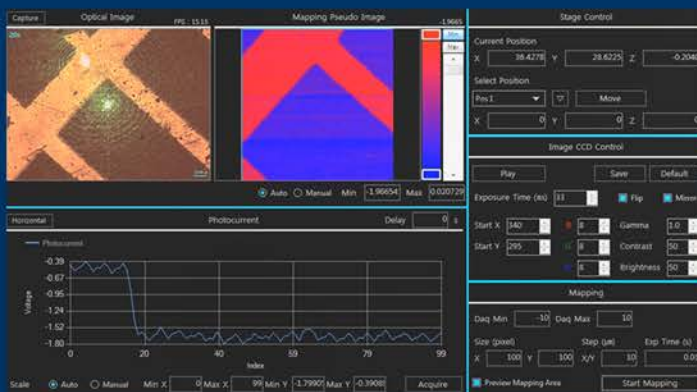

Micro Probe Station (MPS) is suitable to analysis the Electrical & Optical properties of the materials.

## Applications

Gas Sensor / Raman / Photocurrent  
I-V Measurement  
FET Characterization Test / Reflectivity  
Thermal Conductivity (3  $\omega$  Method)  
Thermal Hysteresis / EL & PL

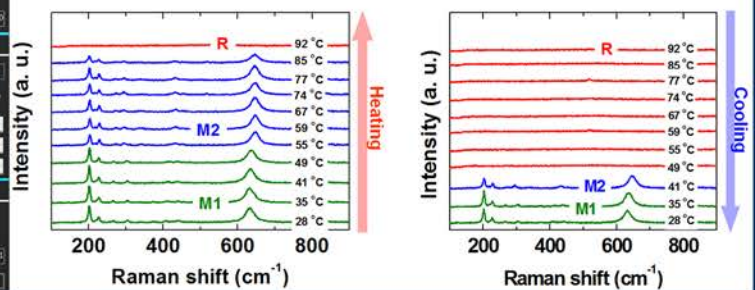

## Photo current mapping

## Raman spectrometry

- ☐ Sample: Vanadium dioxide( $\text{VO}_2$ ) nanowire
- ☐ Study of phase transition by temperature
